Welcome

The Verizon T41SW IP desk phone is a Voice-over-IP (VoIP) business phone with nine programmable line keys. The desk phone and the line keys support the integrated service features of One TalkSM from Verizon. The T41SW features work the same way on your desk phone, smartphone and tablet computers.

Initial setup

If your T41SW desk phone was not connected and set up by your IT account administrator, verify the following with your administrator:

- 1. You have a One Talk number
- 2. Your user information has been updated in the One Talk Admin Portal with your 911 address and email address
- 3. Your number has been included in any business group features

Connecting the phone to power and Ethernet

Power

You have two options for power: AC power (wall outlet) or Power over Ethernet (PoE). Your system administrator will advise you which to use.

Network

Connect the included standard Ethernet cable (or other standard Ethernet cable) between the internet port on the phone and the port on the wall or on your PoE-capable switch/ hub device.

Startup

After your phone is powered on, the system boots up and performs the following steps:

Dynamic Host Configuration Protocol (DHCP)

The phone attempts to contact a DHCP server in your network to obtain valid IPv4 network settings by default.

Automatic Phone Initialization

When your One Talk phone is connected to the network and powered on, it will automatically start the initialization process. The LCD screen displays "Initializing, please wait during this process." The phone finishes the initialization by loading the saved configuration.

The desk phone is ready for use.

Viewing E911 location information

Enhanced 911 (E911) is a location technology that enables emergency responders to know the geographical location of a caller who dials 911. Your One Talk account administrator will configure your location. Contact your administrator if your E911 address is missing or inaccurate.

Note: This device will not function unless an initial E911 address has been added.

To view your 911 address, press the **Address** line key to the right of the LCD screen.

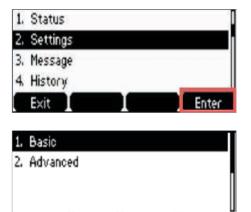

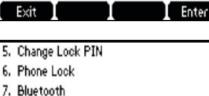

Configuring Wi-Fi via phone user interface

To access Basic settings:

- 1. Press the Menu soft key while the phone is idle
- 2. Use the Settings and press Enter to select
- 3. Select the Basic setting and press the Enter soft key
- 4. Scroll to Wi-Fi and press Enter
- 5. Press the Switch soft key to turn Wi-Fi on
- 6. Press the **Save** soft key. The phone will automatically search for available wireless Wi-Fi networks in your area
- 7. Select an available wireless network from the list of available networks
- 8. Press the **Connect** soft key to connect to the wireless network
- 9. If the network is secure, enter its password in the Password field and then tap the **OK** soft key

Getting to know your desk phone

Hardware components

| | Item | Description |
|---|---------------------|--|
| 1 | LCD screen | Displays info about calls, messages, soft keys, time, date and other relevant data, such as: • Caller ID • Call duration • Icons • Missed call and second incoming caller information • Prompt text |
| 2 | Power indicator LED | Indicates the status of phone power and some phone features (such as whether they are on or off) |
| 3 | Line keys | Can be programmed to activate up to three accounts and have phone features assigned to them |
| | Mute key | Toggles to indicate whether a feature is muted or not |
| 4 | Headset key | Toggles to indicate whether the phone is in headset mode or not |
| | Message key | Accesses your voicemail messages |
| | Redial key | Redials a previously dialed number |

| | Item | Description |
|---|------------------|---|
| 5 | Speakerphone key | Toggles unit into hands-free speakerphone mode |
| 6 | Volume key | Adjusts the volume of the handset, headset, speaker and ringer |
| 7 | Keypad | Provides the digits, letters and special characters in context-sensitive applications |
| | 0000 | Allows you to scroll through the displayed information |
| 8 | OK | Confirms actions or answers incoming calls |
| | × | Cancels actions or rejects incoming calls |
| 9 | Soft keys | Can be customized as shortcuts to specific features |

| | |

Line key LED

| LED status indicator | What it means |
|-------------------------|---|
| Solid green | The line is in use on current device. |
| Solid red | The line is in use but on another device. |
| Slow flashing red | The line has been placed on hold from another device. |
| Fast flashing green | The line is receiving an incoming call. |
| Slow flashing green | The call is placed on hold from current device. |
| Off | The line is inactive. |

Customizing your desk phone

About Basic settings

Setup and preference options for the following can be found in the Basic settings menu:

- Language preferences
- Time and date
- · Display settings
- · Ringtone and keypad sound settings

To access Basic settings:

- 1. Press the Menu soft key while the phone is idle
- 2. Use the **O** keys to navigate to Basic settings and press **a** to select

Language preferences

The default language on the phone's user interface is English.

To change the language of the phone interface:

- 1. Press the Menu soft key to open the main menu
- 2. Use the 2 keys to navigate to and select Settings
- 3. Use the O keys to navigate to and select Basic
- 4. Use the S keys to navigate to and select Language
- 5. Scroll Solution to your preferred language, highlight it and select it

Time and date

Time and date are displayed in the middle of the status bar. You can also set your preferred formats for displaying time and date in the Time & Date settings screen. The phone is defaulted to SNTP so as to synchronize the time zone with the provided 911 address.

To navigate to the Time & Date settings screen:

- 1. Press the Menu soft key to open the main menu
- 2. Select Settings
- Use the local keys to navigate to Basic settings and press
 to select
- Scroll Sto Time & Date and press sto select

To configure the time zone to synchronize with the address entered in the Admin Portal (SNTP):

- 1. From the Basic settings screen, highlight Time & Date and press 💿
- 2. Scroll 😨 🙆 to SNTP settings and press 🚳 to select
- 3. Press the **Save** soft key to accept the changes

To set time and date format preferences:

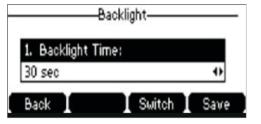

- 1. From the Basic settings screen, scroll 💽 🛆 to Time & Date Format and press 💿 to select
- 2. Scroll Solution to Time & Date Format and press of to select your preferred formats
- 3. Scroll Content to select **Hour**, **Clock** or **Date** format. To change the format, press **Content** to find, highlight and select desired format. Press the **Save** soft key to accept the changes

Display settings

To change backlight duration:

You can set the time duration for the backlight of your desk phone as Always ON, Always OFF or several other options. For example, you can have your display switch to low-light mode after a period of inactivity. You can also turn off the backlight completely when inactive. To set backlight levels and duration of inactivity before switching to low light or turning the backlight off:

- From Display settings, scroll Sto Backlight and press to select
- Scroll (b Backlight Active Time and select one of the following to choose your preferred time: Always ON, Always OFF, 15 sec, 30 sec, 60 sec, 120 sec, 300 sec, 600 sec or 1800 sec
- 3. Press Save

Sound settings

Call volume

Press **Press** on the phone console to adjust the volume of the receiver when you are on a call (using the handset, speakerphone or headset).

Ringer volume

Press **end** on the phone console to adjust the volume of the ringer when the phone is idle.

Ringtones

- From Sound settings, scroll Solution to Ringtone and press to select
- 2. Highlight the desired line
- 3. Press on then select the desired ringtone and press **Save**. If there are multiple lines on the desk phone, you can elect to assign one ringtone for all lines by selecting **Common AES** or assign a different ringtone for each line
- 4. Scroll **O** to preview ringtone options and press the **Save** soft key to select

Keypad tones (key tones)

Keypad tones, or key tones, give you the option of hearing sounds each time you depress a key on the keypad. To activate key tones:

- 1. From Sound settings, scroll 💽 🛆 to Key tones and highlight it to select it
- 2. Use the **Switch** soft key to enable or disable Key tones, and press the **Save** soft key to accept the changes

Line keys

Your T41SW comes with nine configurable line keys. You can use them to create one-button speed dials for frequently dialed numbers.

To view all lines, press the **1 2 3** pages key on the idle screen to toggle to additional line key pages.

Speed dial configuration of a line key

To configure a speed dial key:

- 1. Press and hold an unused line key (for about five seconds)
- 2. Use **O** or the **Switch** soft key to scroll through the type of line keys available until you locate Speed Dial
- 3. Scroll 2 to complete each of the following fields:
 - Account ID: Select the phone line to associate with this line key
 - Label: Enter the name you would like displayed on the line key label
 - Value: Enter the phone number you would like this line key to dial
- 4. Press the Save soft key to accept your changes

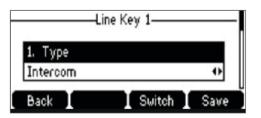

You can now use this line key to speed dial this contact.

Intercom key setup

1. From the Home screen, press and hold an empty soft key

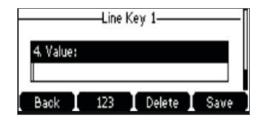

2. From the Type field, press the **Intercom** soft key

- 3. Enter the appropriate information then press the **Save** soft key:
 - Label
 - Value (extension number)

You will get a prompt to enter the extension number if left blank.

Using the Intercom key

General information:

- If you attempt to use speed dial to dial the extension needed for an intercom call, your phone will display an error message. You must enter the extension manually if no extension is defined in the Intercom line key
- Intercom calls do not have a standard ring. You'll hear a beep, and the intercom call will be auto-answered
- Desk phones with the Do Not Disturb (DND) feature enabled do not receive intercom calls. If no other desk phones share the One Talk phone number, the intercom call is directed to Voice Mail
- If there are additional desk phones sharing the same One Talk phone number (where DND is not enabled), those devices receive the intercom call. There is no way to tell which desk phone will receive the intercom call if multiple desk phones are sharing the same One Talk phone number

To use a dedicated Intercom line key when extension is not defined:

1. From the Home screen, press the Intercom soft key

2. Enter the target extension for Intercom, then press the **Send** soft key

To use a dedicated Intercom line key when extension is defined:

1. From the Home screen, press the soft key next to the Intercom label

2. The Intercom is now connected

Voice Mail setup

- 1. Press the 🖾 message key on the phone console
- 2. Select your preferred language
- 3. Create a four-digit passcode
- 4. At the voice prompt, record your name
- 5. Select a greeting, either personalized or standard

See "Basic Voicemail User Guide" for more information.

Basic call features

Make outgoing calls.

From the handset:

Pick up the handset, enter the phone number and press the **Send** soft key.

Using the speakerphone:

With the handset on-hook, press , enter the number and press the **Send** soft key.

From a headset:

With the headset connected, press () to activate the headset mode, enter the number and press the **Send** soft key.

From your Call History:

- 1. Press the History soft key
- Press or b to switch between All, Placed, Received, Missed and Forwarded call lists

- 3. Press Sor Sto select the desired entry
- 4. Press the Send soft key

From your directory:

- 1. Press the **Directory** soft key
- 2. Select the desired contact group and press the **Enter** soft key
- 3. Press 🜍 or 🙆 to find and highlight the desired number
- 4. Press the one soft key to dial out the number

Manage multiple lines.

The telephone number assigned to your desk phone gives you three different lines you can use to place and receive calls. Each line is represented by a line key with your One Talk number. You can use these lines to simultaneously hold three separate conversations or conference in up to six participants. To move between the lines, place the current one on hold and press the desired line.

Receive incoming calls.

When not already on a call:

- · Using the handset: Pick up the handset
- Using the speakerphone: Press
- Using the headset: Press

While on a call or the line is otherwise in use:

Press the corresponding incoming line key to answer the call.

Alternatively, press **Hold** to place the current call on hold, then press **Answer** to pick up the incoming call. Or press **Ignore** to trigger your Call Forwarding preferences.

You can also activate Do Not Disturb mode to turn off ringing and automatically ignore calls by pressing the **DND** soft key.

Ignore a call.

Press **Ignore** during an incoming call when you wish to trigger the call forwarding options you configured for Call Forward Busy or Call Forward No Answer.

End a call.

Using the handset:

- 1. Press the End Call soft key
- 2. Hang up the handset

Using the speakerphone:

Press the End Call soft key.

Using the headset:

Press the End Call soft key.

Hold a call.

Press the Hold soft key during a live call.

Resume a call.

If there is only one call on hold, press the **Resume** soft key.

If there is more than one call on hold, press 🕤 or 🛆 to select the desired call, then press the **Resume** soft key.

Mute/unmute your phone's microphone.

Press 🕘 during a call.

Redial.

- 1. Press 🖸 to enter the placed call list
- Press S or S to select the desired entry
- 3. Press 🖸 or the Send soft key

Redial last number.

Press 💽 twice when the phone is idle to dial out the last-dialed number.

Block a call.

There are two ways to block incoming calls from ringing on your phone:

- Anonymous Call Rejection blocks incoming calls that restrict the display of their outgoing caller ID information
- Blacklisting allows you to specify contact names and Call History numbers from which you do not wish to receive calls

To enable Anonymous Call Rejection:

- 1. Select the Features line key
- 2. Scroll Control to navigate to and select Anonymous Call Rejection
- Press at to turn the feature on or off

To blacklist a contact:

From your directory:

- 1. Press the Directory soft key while the phone is idle
- 2. Locate the contact you wish to blacklist by selecting All Contacts or the Group to which the contact belongs
- 3. Use **O** to navigate to the contact and press the **Options** soft key
- 4. Select Add to Blacklist

- 3. Scroll **O** to highlight the contact you wish to unblock and press **Options**
- 4. Select **Add to Contacts** and press I to accept the change

Bridge Line

The One Talk Bridge Line feature lets you use your own desk phone to receive and place calls on behalf of other phone numbers. Incoming calls to those telephone numbers will ring on your desk phone, and you can use those other numbers to place calls directly from your own desk phone.

To configure another phone number to your desk phone:

Your organization's One Talk account administrator can configure bridged devices by logging into the My Business Verizon One Talk Admin Portal.

Monitoring and answering a bridged line:

- 1. When a call is made to a bridged line, it will appear on your screen
- 2. Press the appropriate line key to answer the call. The monitored phone's status display will now show that the line is busy

Once a call is answered on a bridged line, you will have access to the same features that are available on your own desk phone line.

Call Barge

Any bridged line or other device that shares a number with you can use the Call Barge feature to join a call in progress. Call Barge is especially useful for admins when it is urgent that a manager be reached immediately.

To use Call Barge, your account administrator must configure the barge function in the One Talk Admin Portal.

To barge in on a call to your One Talk number or Bridge Line:

- 1. Press and hold the in-use line key for approximately five seconds*
- 2. Press the Barge In soft key to barge in on the active call
- *The Line Key indicator will light steady green when the line is busy (on an active call).

To set a warning tone during Barge In:

One Talk can be configured to notify you when another user barges in on a call. For more information, refer to the User Portal Guide or contact your systems administrator.

Remote Group Pickup

One Talk helps ensure that calls are answered by associating lines with groups such as company departments. If your administrator has assigned your line to a specific group, Remote Group Pickup enables you to remotely pick up a group member's ringing line from your own desk phone.

Dial ****98** from your desk phone to remotely pick up a group member's ringing line.

Call Forwarding

This feature allows incoming calls to automatically ring another phone number or to be sent directly to Voice Mail, depending on your preferences. The following options are available:

Call Forward Always

Forwards all calls made to your One Talk phone number to an alternative phone number. Calls can be forwarded to any domestic U.S. toll or 800 number.

Call Forward Busy

Forwards calls to an alternative number when your One Talk number is busy. Calls can be forwarded to any domestic U.S. toll or 800 number.

Call Forward No Answer

Forwards calls to an alternative phone number when there is no answer at your One Talk number.

Call Forward to Voice Mail

Automatically forwards calls made to your One Talk phone number to your Voice Mail box when one of your optional preferences above (Always, Busy, No Answer) is set.

To set forward-to phone number and configure Call Forwarding preferences:

- 1. Select the **Features** line key
- 2. Scroll Solar and select Call Forwarding
- Scroll Solution of the select your forwarding preference (Always Forward, Busy Forward or No Answer Forward) and click a
- 4. Use the O keys to enable/disable
- 5. If enabling, scroll S to the Forward To: field and enter the number to which you want your calls forwarded
- 6. When you are finished, select the Save button

Call Move

If your One Talk number is shared with other devices, when you are on a live call, you can move from your desk phone to your mobile device or tablet and from your other devices to your desk phone without disconnecting.

To change phones:

- 1. Place the call on hold by pressing the Hold soft key
- 2. On your mobile device, tap the **Active Call** icon then select **Retrieve** to continue the call

To retrieve a call from your desk phone:

If you placed a call on hold from another device, the line key on your desk phone will be flashing red. To pick up the call, press the corresponding line key.

Call Park and Retrieve

Call Park and Retrieve is a form of call hold that lets you assign or "park" an active call to another member's extension or 10-digit phone number for easy retrieval within the same group.

Calls can also be retrieved by the person who parked the call. If you park a call against your own extension, it's just like placing the call on hold, but with a ringback reminder. If you've enabled the Music on Hold option, callers will hear music.

To park a call:

1. While on an active call, press the **Park** soft key. The user will hear a message stating, "Please dial the number where you want to park your call followed by #, or dial # to park the call against your number"

| Intercom | Talking | Features |
|-----------------|----------------|----------|
| FirstN | 3303174331 | |
| S FirstN | 00:07 HD | # 123 |
| | onference Park | More |

- 2. Enter the appropriate 10-digit number or the extension number followed by #
- 3. Press # to park against your own extension

To retrieve a call:

- Press the **Retrieve** soft key
- The user will receive audio and visual notification of the parked call
- The call can be retrieved by dialing **88 + extension

Caller Line ID Block

You can opt to place outgoing calls anonymously by pressing ****67** prior to dialing. This will prevent your phone number or any other caller ID information from appearing on the recipient's display.

Conference calling

You can use any of your lines to hold a one-person conversation or a conference call. While on a call:

- 1. Press the **Hold** soft key during an active call. Then press **New Line**
- 2. Enter the number of the second party, and then press the **Send** soft key
- 3. Press the **Conference** soft key when the second party answers. All parties are now joined in the conference
- 4. Repeat steps 1 to 3 to hold up to a six-way conference call

Do Not Disturb

Rejects incoming calls automatically. If no other devices share the One Talk number, callers can be forwarded to Voice Mail when DND is enabled.

- 1. Select the button that is under DND on your phone display
- 2. A DND icon will display at the top of the screen. Press the button under DND to toggle the feature on or off

Transferring calls

You may transfer an active call to any other phone number (it does not have to be a One Talk number). There are three transfer options: Consultative Transfer, where you have an opportunity to speak with the called party before transferring the call for pickup; Direct Transfer, where the current active call is transferred with no dialog between you and the called party; and Direct Transfer to Voice Mail.

Consultative Transfer

While on a call:

- 1. Press the **Transfer** soft key; this will place the other party on hold
- 2. Use the dial pad to enter the number (extension or 10-digit number)
- 3. Press **Consult**; you will be connected and can inform the called party of the pending transfer
- 4. Press Transfer to complete

Direct Transfer

While on a call:

- 1. Press the **Transfer** soft key; this will place the other party on hold
- 2. Use the dial pad to enter the number (extension or 10-digit number)
- 3. Press Direct

Direct Transfer to Voice Mail

Direct Transfer to Voice Mail enables you to transfer a call to someone else's voicemail.

- 1. Press the **Transfer** soft key during an active call. This will place the call on hold
- 2. Press ****55**, then enter the 10-digit phone number or extension to which you want to transfer the call
- 3. Press the Direct soft key to complete the transfer

Call History

Call History maintains a list of all calls that were missed, placed, received and forwarded. You can view your Call History, place a call, add a contact or delete entries from the Call History list. Call History can be accessed from the idle screen or main menu.

View Call History.

- 1. Select the History soft key
- 2. Scroll Call History
- When the desired phone call is highlighted, press one of the four soft keys beneath the screen to select your desired function: **Back** (to return to the previous menu), **Delete**, **Options** (Detail, Add to Contacts, Add to Blacklist) or **Send** (to call the number)

- 3. Select Delete All
- 4. Select 💿

Blacklist a number from your Call History/remove a number from your blacklist.

See "Advanced Call Features > Block a call > Blacklist a call."

Contact management

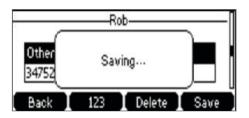

The built-in phone directory can store the names and phone numbers of your contacts. You can store up to 1,000 contacts and 48 groups in your phone's local directory. You can add new groups and contacts; edit, delete or search for a contact; and dial a contact number directly from the local directory. Contacts can also be moved between groups.

Local Directory

To add a contact:

- 1. Press the **Directory** soft key when the phone is idle, and then press **All Contacts**
- Scroll Scr
- 3. Press the Add soft key to add a contact
- 4. Enter a unique contact name in the Name field and contact numbers in the corresponding fields
- 5. Use the Skey to enter other information (work number, mobile number, etc.)
- 6. Press the Add soft key to accept the change

| Search Enter |

To remove a contact from blacklist:

1. Press Menu and then the Directory soft key

Options

<u>Nk</u>

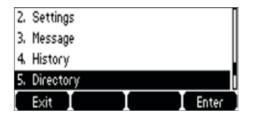

2. Select the Blacklist folder

Add

3. Select Options

Back

- 4. Highlight Add to Contacts and tap the or soft key
- Highlight Move selected to contacts and tap the soft key

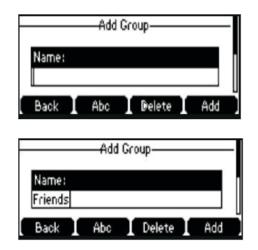

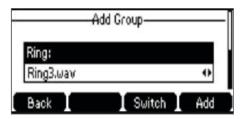

Groups

Groups are a great way to organize large lists of contacts, such as by function or department. Groups help you more quickly find the individual(s) you need to reach. You can even assign each group its own distinctive ringtone. You can edit, delete and blacklist group contacts and move contacts to different groups.

To create a group:

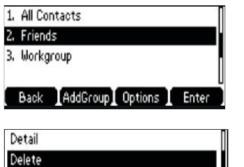

- 1. Press the Directory soft key
- 2. Select Add Group
- 3. Using the keypad, enter a group name
- 4. Use the server to scroll to and select a ringtone to assign to the group (if desired)
- 5. Once you are finished editing, select Add

To delete a group:

- 1. Press the **Directory** soft key
- 2. Select the desired contact group
- 3. Press the **Option** soft key and then select **Delete** from the prompt list
- 4. Press the on soft key to confirm the deletion or the **Cancel** soft key to cancel

Cancel

To assign a contact to a group:

- 1. Press the **Directory** soft key, then press **All Contacts** or the group to which the contact belongs
- 2. Scroll O to highlight the contact you wish to edit
- 3. Press the **Options** soft key and select **Detail** from the prompt list
- 4. Scroll C to Group field and C to select the desired group
- 5. Press the Save soft key to accept the changes

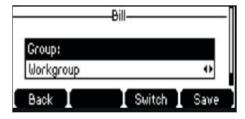

To move a contact to a different group:

- 1. Press the **Directory** soft key, then press **All Contacts** or the group to which the contact belongs
- 2. Scroll **O** to highlight the contact you wish to move, then press **Options**
- 3. Press **Detail**, select a different group, and press **Assign** to Group

Features

Accessibility

PoE support

Display and input

- · Six line keys (three-page view)
- Dual-color (red or green) illuminated LEDs
- Illuminated Mute, Headset, Hands-Free speakerphone keys

Network

- Advanced Calling (HD Voice) technology
- Dual-port Gigabit Ethernet
- IPv6
- SIP v1 (RFC2543), v2 (RFC3261)
- Supports bridging that allows T41P, T41S, T42S, T46G, T46GW, T46S, T46SW and T49G to monitor incoming calls
- Transport Layer Security (TLS)
- HD Voice

Applications and software

One Talk compatible

Form factor

- 1 x RJ12 (6P6C) EHS port
- 1 x RJ9 (4P4C) handset port
- 1 x RJ9 (4P4C) headset port
- 2 x RJ45 10/100 M Ethernet ports
- Desk phone
- · Integrated stand with two adjustable angles
- Message Waiting Indicator (MWI)
- Power over Ethernet (IEEE 802.3af), Class 2
- Wall mountable

Product

- Full-duplex, hands-free speakerphone with AEC
- Mute, Auto Answer, Do Not Disturb
- Manual or automatic date/time setting

Accessibility features

For hearing-impaired users

| Feature | Description | | |
|--|--|--|--|
| Adjustable ringtone and volume | Choice of a variety of ringtones. Volume of the ringer can also be changed to suit needs. | | |
| Adjustable call volume | While on a call, raise or lower the volume of the voice on the far end and of other phone sounds heard. | | |
| Visual notifications | Indicators on the phone screen, such as flashing bars or icons, indicate when calls are incoming or outgoing, or if a call is active or held. Indicators can also indicate phone status and if certain features are activated. | | |
| Electronic hookswitch support | When using a headset that supports electronic hookswitch (EHS), controls on the headset can answer and end calls. In addition, call volume can be controlled and calls may be able to be muted from the headset. | | |
| Headset memory mode | Headset can be set up to take all calls. | | |
| Hearing-aid compatible (HAC) handsets | The standard handset for One Talk desk phones is not fully HAC compatible. If customers require HAC-compliant handsets, they can be provided by Verizon. | | |
| Visual Message Waiting Indicator | An indicator light on the phone indicates that new messages are waiting. Icons on the phone screen also indicate that the phone has new messages. | | |

For vision-impaired and blind users

| Feature | Description | |
|---|--|--|
| Adjustable backlight settings | Change the backlight setting of the screen by adjusting backlight settings. | |
| Tactile five-key with raised bumps | The five-key has bumps that let users easily discern the position of other keys on the keypad. | |
| Large keys Large keys on the phone console enable easy to phone features and functions. | | |
| Physical line keys | Phones have physical line keys to answer and end calls. | |
| Variety of feature keys to press | Many features on phones are accessible by pressing feature keys on the phone console. | |
| Tactile-discernible number, feature and navigation keys | Keys on the phone console are easily discernible by their size and shape. | |
| Illuminated feature keys | Many feature keys are illuminated when activated, providing alerts when a feature is enabled. | |

For mobility-impaired users

| Feature | Description | | |
|--|--|--|--|
| Dedicated headset jack that enables the auto-answer function | Headset can be set up to take all calls. | | |
| Touch screen | Certain One Talk phones have large touch screens to tap, swipe and press to perform phone functions and activate features. | | |
| Built-in speakerphone | A built-in speakerphone allows users to use the phone without having to use a handset or headset. | | |
| Adjustable phone stand | One Talk phones have adjustable stands, so the phone can sit at a comfortable angle on the desktop. | | |

Important customer information

To avoid electric shock, use caution when connecting cables. For example, do not connect safety extra-low voltage (SELV) circuits to telephone-network voltage (TNV) circuits. LAN ports contain SELV circuits, and WAN ports contain TNV circuits. Some LAN and WAN ports both use RJ-45 connectors.

To avoid electric shock, do not operate the product or connect or disconnect cables during electrical storms. To avoid electric shock, do not use this product in or near water.

To reduce the risk of fire or overheating, keep this product in well-ventilated areas, away from radiators or other heat sources. Do not block cooling vents.

The plug-socket combination must be accessible at all times because it serves as the main power-disconnecting device.

Use only the manufacturer-provided AC adapter approved for use with this product. Use of another AC adapter may cause a fire or explosion.

This product relies on short-circuit (overcurrent) protection installed in your home or office. Ensure that a fuse or circuit breaker no larger than 120 VAC, 15A U.S. is used on the phase conductors (all current carrying conductors).

Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- 1. When the power cord or plug is damaged or frayed
- 2. If liquid has been spilled into the product
- 3. If the product has been exposed to rain or water
- 4. If the product does not operate normally when the operating instructions are followed. Adjust only those controls that are covered by the operating instructions, since improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal condition

WEEE warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and collect such WEEE separately.

No parts of this publication may be subject to alteration, modification or commercial use. Yealink Network Technology CO., LTD. will not be liable for any damages arising from use of an illegally modified or altered publication.

Warranty

The specifications and information regarding the products in this guide are subject to change without notice. All statements, information and recommendations in this guide are believed to be accurate and presented without warranty of any kind, express or implied. Users must take full responsibility for their application of products.

Yealink Network Technology CO., LTD. makes no warranty of any kind with regard to this guide, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. Yealink Network Technology CO., LTD. shall not be liable for errors contained herein nor for incidental or consequential damages in connection with the furnishing, performance or use of this guide.

Important 911 emergency response information

If you call 911, emergency service responders will be sent to the registered location you provided when you provisioned this phone. An incorrect address could result in incorrect routing of 911 calls and dispatch of emergency personnel to the wrong location, so please contact us if your registered location is not accurate.

Data and voice functionality (including the ability to make and receive 911 calls) will not be available during a power outage, broadband connection failure or other service disruption. Neither Verizon Wireless nor any of its affiliates shall be liable for any service outage and/or inability to access emergency service personnel, nor shall Verizon Wireless or any of its affiliates be responsible for the acts or omissions of emergency response center personnel.

CE

Declaration of conformity

Hereby, Yealink Network Technology CO., LTD. declares that this phone is in conformity with the essential requirements and other relevant provisions of the CE, FCC. You can find the CE and FCC information from the label on the back of the IP phone.

CE mark warning

This device is marked with the CE mark in compliance with R&TTE Directive 1999/5/EC.

Part 15 FCC Rules

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device is compliant with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference
- 2. This device must accept any interference received, including interference that may cause undesired operation

Class B digital device or peripheral

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1. Reorient or relocate the receiving antenna
- 2. Increase the separation between the equipment and receiver
- 3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- 4. Consult the dealer or an experienced radio/TV technician for help

Important safety precautions

Please read the following important safety notices and instructions before installing or using the product.

- A DANGER warning refers to situations that could cause bodily injury
- A CAUTION warning refers to situations that could result in equipment malfunction or damage
- 1. Follow all warnings and instructions marked on the product
- 2. Unplug this product from the wall outlet before cleaning Do not use liquid cleaners or aerosol cleaners. Use an antistatic cleaning pad for cleaning
- 3. Do not use this product near water
- 4. Do not place this product on an unstable cart, stand or table. If the product falls, it could be seriously damaged
- 5. This product should be operated using the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company
- 6. Do not allow anything to rest on the power cord. Do not locate this product where people will walk on the cord
- 7. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock
- 8. Never spill liquid of any kind into or onto the product
- 9. Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks
- 10. Refer all questions regarding servicing of this product to qualified service personnel

Danger-electric shock and fire

Electric current from power, telephone and communication cables is hazardous and could result in electric shock and/or fire.
